Current Book & Speaking Topic

How AI Will Forever Change the Way That Teachers Teach and Learners Gather Information

This is the current presentation that is connected to Dr. Stafford's book signing events. It is a 30- to 40-minute presentation that delves into the profound changes generative AI is bringing to education. It focuses on these themes:

- The operational principles of generative AI
- The concepts of prompt engineering, prompt training, and prompt chaining
- The ethical considerations encompassing generative AI
- Five strategies to readily incorporate AI into the classroom
- A Q&A session will follow
- Book signings.

Other Speaking Topics

- The Future of Online Learning in K-12, Higher Education, and Industry
- Holistic Virtual Education
- Digital Literacy in the 21st Century
- Designing Virtual Curriculum for Diverse Industries
- AI and Futuring Instructional Design
- Navigating Virtual Instruction

Testimonials

- "Dr. Tim Stafford is a champion for best-practice instructional strategies. His vision and relentless effort to promote quality instruction are unequalled". - Dr. Max Cropper, *Five Star Instructional Strategies*
- "Dr. Stafford (Tim) brings a whole new and fresh approach to anything in which he is involved. He brings deep expertise in applying technology tools to streamline the delivery process of a project. He manages and works well with teams, making everyone feel like a valuable member. Over the years I have worked with Tim, he has proven to be a consummate professional. I recommend him highly." - George DuBose, *Chairman of the Board, Hampden DuBose Academy*
- "I have had the pleasure of attending Tim's presentations for many years. The insights he brings to the topics he presents are relevant, timely, and 'just what the doctor ordered.'" - Jason Ansley - *Above-the-Line Leadership Coach*
